Problem Statement

Children are unsuspecting meat eaters: An opportunity to address climate change

Erin R. Hahn, Meghan Gillogly, Bailey E. Bradford [1]

An online study examining children's selection of vegetables at mealtimes: The role of meal contexts, variety and liking

L.R. Chawner, P. Blundell-Birtill, M.M. Hetherington [2]

Tina (7)
Primary School Kid

Needs
Lack of knowledge regarding food, her own body and region

Pains
Poor non-regional diet and no connection to nature

Sarah (37)
Attorney at law

Needs
Wants a healthy lifestyle and diet for her and her family

Pains
Insufficient knowledge of supply of regional seasonal veggies and fruits

Anton (53)
Farmer

Needs
Wants to sell his home produced veggies and fruits to local and regional buyers

Pains
Has no knowledge of marketing and to reach his customers

Solution

**We plant a seed in kids' minds,
so they intrinsically create a demand for healthy,
seasonal and regional food with our APP.**

Unique Selling Proposition (USP)

Gamification

We use GAN's to generate fake images of veggies and fruits.

Daily Challenges

Keep being hooked by solving daily challenges and receive rewards.

Seasonality & Regionality

Get to know the nature, fruits and veggies next door to you.

Product I

Initial Starting Screen

- **Current Revenue Streams**

  Freemium

- **Free Version: Easy & Medium Mode**

- **Pro Version: Expert Mode**

Product II

Easy Mode (Free Version)

Generative Adverserial Network (GAN)

A GAN has been trained on images from vegetables and fruits to generate real-looking fake images of imaginary vegetables and fruits.

For Young Kids and Playful Adults

This is the primary mode addressing children, because they are encouraged to distinguish real from fake food.

Product III

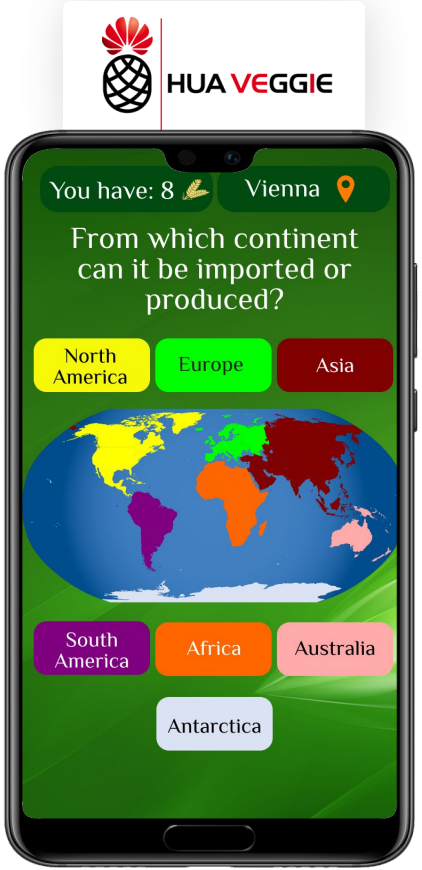
Medium Mode (Free Version)

Location Based Question

An image of a veggie or fruit is shown and the user shall guess from which continent or country it comes from.

For School Kids and Adults

From here on the questions are not only image, but also text based.



Product IV

Expert Mode (Pro Version)

Local and Regional Based Questions

Based on your mobile location, questions are generated that ask if this fruit or veggie is local or regional.

Informative Harvesting Videos

Get additional information in the pro version, like videos about the process of harvesting.

Product V

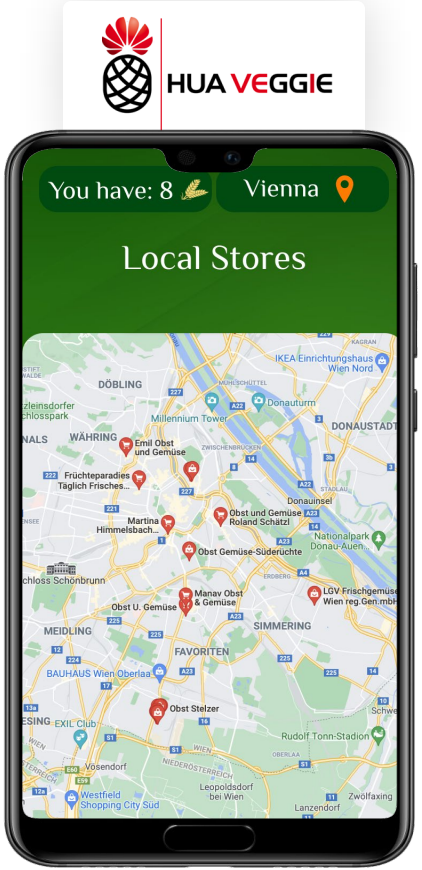
Local Stores (Pro Version)

Find Local Shops for Local Foods

After answering the question, you can see where to actually buy it locally.

Collect Wheat Points for Discount

Trade wheat points for discounts or directly with veggies at the stores of our local farmers.



Next Steps

Funding

Bundesministerium Landwirtschaft, Regionen und Tourismus

Bundesministerium Bildung, Wissenschaft und Forschung

Additional Revenue Streams

Deals with Local Farmers

School Licences for Pro Versions

Enroll Mobile Tracking globally

From our pilot project in Austria, we want to enroll the mobile location based quizzes globally.

Add Characters to improve effectiveness

Research has shown, that children are more likely to eat healthy veggies and fruits if they are presented by funny characters [1].

Improving Willingness to Try Fruits and Vegetables Among Low-Income Children Through Use of Characters

Caree J. Cotwright, Courtney Alvis, Fabiola de Jesus Jimenez, Paula Farmer, Chisom Okoli, Jennine Delane, and Ginnefer O. Cox
